Summary

I am a motivated and detail-oriented aspiring software developer with knowledge in MERN stack (MongoDB, Express, React, Node.js). I have built projects like a job portal application and have hands-on experience in developing responsive web applications. I am eager to learn, grow, and contribute to a dynamic organization.

Education

nxtwave of innovation in advanced technologies — Bachelor of Technology • 9.5
nanakramguda — hyderabad • 2024-28

Projects

job-portal — 2026

- Built a **Student Job Portal** using MERN stack with role-based authentication for students and recruiters. Implemented features like job posting, job browsing, application management, and dashboard analytics (total jobs, applications, users) with seamless frontend-backend integration.

prep-tracker — 2026-2026

Developed an Interview Preparation Tracker using React to help users organize and track their learning progress. Implemented features like topic and subtopic management, progress tracking with percentage, notes creation, and a daily study planner. Added functionalities such as search, filtering, sorting, and a streak system to enhance user engagement. Used React hooks (useState, useEffect) and localStorage for state management and data persistence. Designed a clean and responsive UI with a modular component structure.

ai-chatbot — 2026

Developed an AI chatbot using RAG architecture that answers user queries from PDF documents. Implemented FastAPI backend, React frontend, and FAISS-based vector search with LangChain for accurate contextual responses.

static starter — 2026

SGA Smart Management Dashboard

Developed a web-based dashboard to help Student Guidance Associates (SGAs) efficiently manage student data and reduce manual workload. Implemented secure login access restricted to authorized SGA accounts using predefined credentials. The system ensures that only valid users can access the dashboard, preventing unauthorized or student logins. Included clear login instructions with demo credentials for easy evaluation and testing.

Skills

- python
- HTML
- CSS

- React.JS
- Node.js
- MongoDB
- JavaScript
- manual testing
- automated testing
- c++
- express.js
- gen AI

Certifications

Telangana hackathon 2025

nxt wave

Enthusiastic B.Tech student with strong knowledge in HTML, CSS, JavaScript, SQL, Python, and Manual Testing. Participated in Telangana Hackathon, gaining hands-on experience in problem-solving, teamwork, and innovative project development. Passionate about UI/UX design and quality assurance, eager to contribute to real-world projects.
